Dear Hiring Manager,

I am excited to apply for the Computer Science Intern position at your organization. As a highly motivated computer science student, I believe that this internship opportunity aligns perfectly with my academic and professional goals.

In addition to my academic experience, I have also completed several personal projects which have allowed me to further develop my programming skills. For example, i worked as a Scrum Master/full stack developer for a year long software engineering project called GeoTagAR where i was in charge of developing the AR component of the application and implementing scrum framework.

I am eager to apply my knowledge and skills in a real-world setting and believe that this internship will provide me with the opportunity to do so. I am ready to work alongside experienced professionals and learn from them while contributing to the success of the organization.

Thank you for considering my application. I am available for an interview at your convenience and look forward to hearing from you.

Kind Regards,

Jacinth Daniel Moses
